PROFESSIONAL EXPERIENCE

Web Developer - Independent Worker

Aguim, February 2010 - Present

Web application development for own projects. Usually using **PHP**, with the **Laravel** framework, and a **PostgreSQL** database. In this chapter, highlight to Nunti, a notifications service, via SMS, for schools.

Development of institutional websites and online shops for clients, usually using the **WordPress** CMS and, for online shops, the **WooCommerce** plugin.

Web Developer - Simpiens

Curia, May 2013 - July 2014

Development of a video courses platform, which allowed (in a marketplace format) the sale of courses by trainers and their consumption by students.

As the only programmer in the team (in a startup phase), I was responsible for all the development and design. Application developed in **PHP**, with the **CakePHP** framework and a **MySQL** database.
